INTRODUCTION

1. WHAT IS UNITED EMIRATE COIN?

Emirate Coin is an open source, peer-to-peer, Ethereum based Coin carefully developed by Industry experts based in the Middle East. United Emirate Coin is a global payment network that is fully decentralized without central authorities which enable people to store and invest their wealth in a digital currency. The total supply is just 20M making it a huge potential for astronomical increase in price value making investors tons of profits trading and holding UEC. United Emirate Coin is the first cryptocurrency to be developed in the Middle east.

United Emirate coin had their first initial coin offer in December 2017.

United Emirate coin is ***First Arab cryptocurrency.***

United Emirate coin is a form of digital public money created by complex mathematical computations and validated by millions of computer users (blockchain technology). You can store United Emirate Coin on your computer drive, smartphone, hardware wallet or somewhere in the cloud.

The United Emirate Coin transfer system is convenient and easy to use. The transfer of funds can be done anywhere in the world within seconds. United Emirate Coin protects your transaction history and wallet contents from prying eyes, whilst leaving publicly accessible transaction hashes available for the technically discerning to authenticate transactions hereby making the transaction of United Emirate Coin safe and anonymous.

Once you own United Emirate Coins, they behave like physical gold coins: they possess value and can be traded like stocks in popular exchanges. In the future you'll be able to use them to purchase goods and services.

Bitcoin has proven that a peer-to-peer electronic cash system can indeed work and fulfill payments processing without requiring trust or a central mint. However, for an entire electronic economy to be based on a fully decentralized, peer-to-peer solution, it must be able to do the following:

- I. Process transactions securely, quickly and efficiently, at the rate of thousands per hour or more; provide incentives for people to participate in securing the network; scale globally with a minimal resource footprint;
- II. Offer a range of basic transaction types that launch Cryptocurrencies past the core feature of a payment system alone;
- III. Provide an agile architecture that facilitates the addition of new core features, and allows for the creation and deployment of advanced applications; and
- IV. To run on a broad range of devices, including mobile ones.

United Emirate Coin satisfies all these requirements.
